Balancing Regulatory Burden and the EU's Climate Ambitions – Introducing Different Perspectives

2030 Agenda Stakeholder Forum

Warsaw, 27 May 2025

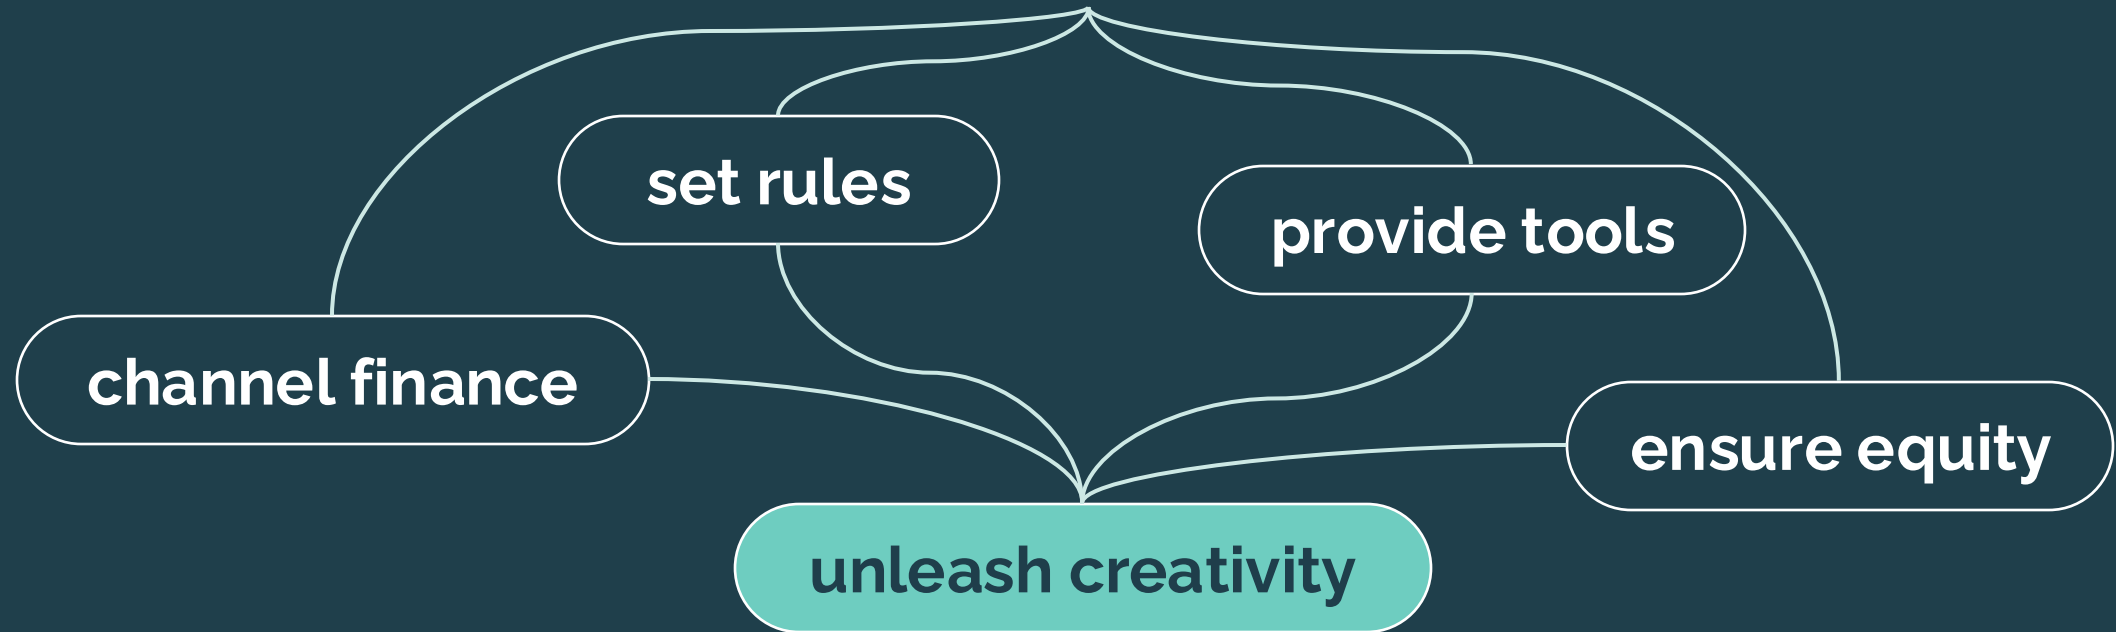

Goal:

Europe to become THE **electro-state**
of the 21. century

(decarbonization is a negative objective)

How?

FACILITATE!

(simplification is a very simplistic approach to one element of facilitation)

Burden vs. facilitation

Burden sources

- **Legal uncertainty**
- **Lack of standardization**
- **Disconnection from wide-spread standards** (due diligence)
- **Lack of time to prepare**
- **Rules without tools**

Facilitation sources

- **Legal certainty**
- **Standardization** (sector standards)
- **Gradual implementation** (phase-in)
- **Tools** (EU-wide databases and IT tools)
- **Support/assist/back up**
