

European Sustainable Development Network Conference 2016

Practical examples of vertical integration
Germany: Sustainable Procurement

Ilse Beneke M.A.
Head of the Competence Centre for Sustainable Procurement

Competence Centre for Sustainable Procurement - who we are

Our Job

- support
- promotion
- stimulation

of sustainable procurement
on all institutional levels

Our basis

The programme of sustainability measures
"Translating sustainability into concrete administrative actions"

Our Team

5

members of staff

Our target-groups

requisitioners and buyers
on the level of

- the federation
- the states
- The municipalities

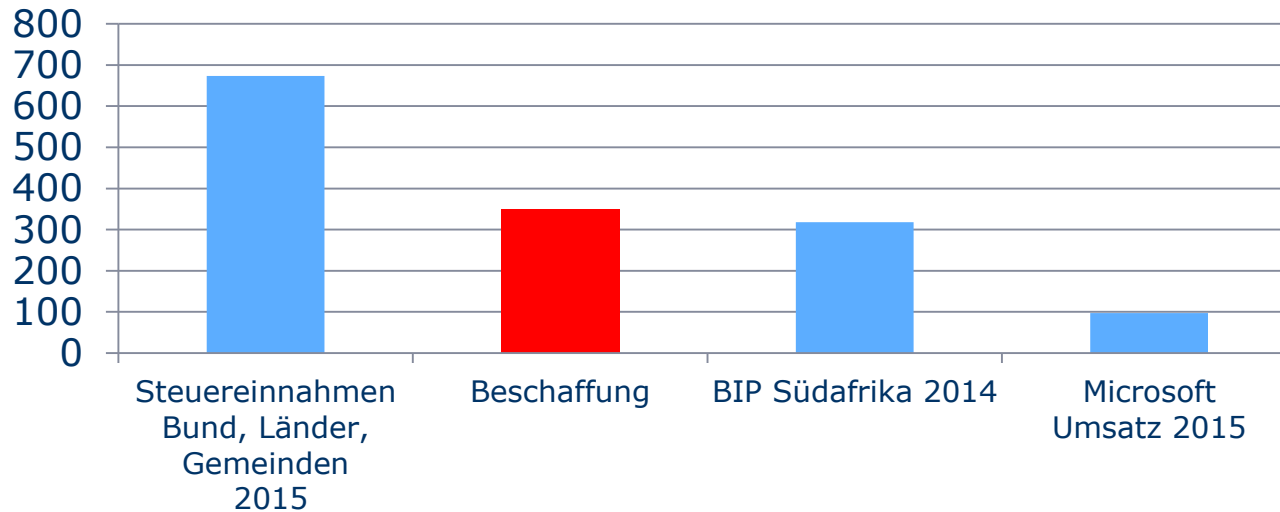

KOMPETENZSTELLE
für nachhaltige Beschaffung

What's so complex and interesting about procurement?

- Financial volume of 350 billion € a year – market impact:

- 3 levels of law and legislation:
EU-Regulations, being transformed into German law,
extra regulation on State-levels
- Personal aspects

The origins of the Competence Centre

2002: Sustainability Strategy

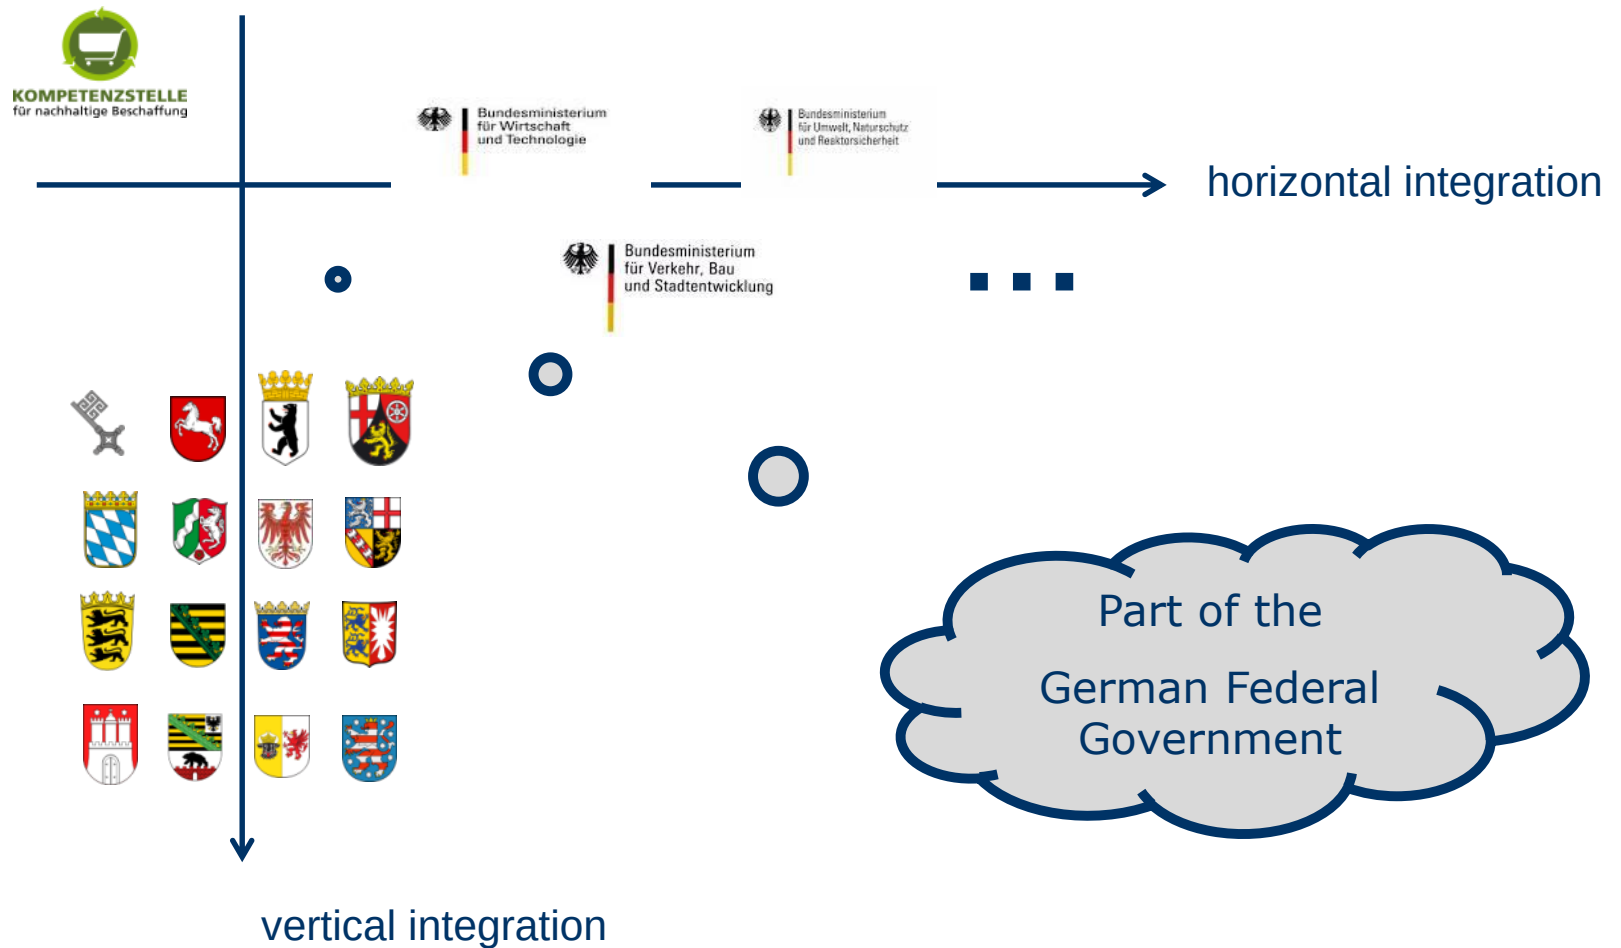

Nachhaltigkeits-
strategie
für Deutschland

2010: Programme of sustainability measures
“Translating sustainability into
concrete administrative actions”

Our job: fostering sustainability in procurement - using horizontal *and* vertical integration

What do we do?

Important instrument
is the website:

- Know
- Show
- Share

On all levels:

- Laws and regulations
- Contact persons
- Practical examples
- Guidelines
