SUSTAINABLE
DEVELOPMENT GOALS

Chapter 4

Factors accelerating SDG progress

Three factors are emerging in Latvia that have great potential to improve Latvia's ability to accelerate progress on sustainable development. Sustainable financial flows are designed to channel investment into an eco-efficient and fair economy and reduce poverty. The cultural space is increasingly becoming a safe place for raising awareness of inclusive sustainable development. The mission-oriented approach calls for economic transformation of the Baltic Sea region into a "blue economy" by involving society in the changes from which it will benefit.

Latvia's VNR (2022) identifies culture's role
